Notice Regarding Technical Center Box Issue Fee Mailings

The Office will begin mailing address labels with the PTOL-85, "Notice of Allowance and Issue Fee Due" for patent applications allowed in all Technology Centers. These address labels should be used to ensure proper routing of post-allowance correspondence. This directive supersedes the "Special Boxes for Patent Mail" instruction. Any Notice of Allowance and Issue Fee Due received without the accompanying address labels should continue to be addressed to Box Issue Fee.

37 CFR Part 1

[Docket No. 980108007-8131-02]
RIN0651-AA97

Changes to Continued Prosecution Application Practice

AGENCY: Patent and Trademark Office, Commerce.

ACTION: Final rule.

SUMMARY: The Patent and Trademark Office (Office) is confirming the amendment of its regulations that removed the requirement that the prior application of a continued prosecution application (CPA) must have been filed on or after June 8, 1995. This requirement was removed in response to requests from the public.

DATES: This final rule is effective on July 2, 1998. The interim rule, published at 63 FR 5732, was effective February 4, 1998.

APPLICABILITY DATE: This rule change applies to all continued prosecution applications filed on or after December 1, 1997.

FOR FURTHER INFORMATION CONTACT: *Concerning this final rule:* Hiram H. Bernstein or Robert W. Bahr, Senior Legal Advisors, by telephone at (703) 305-9285; or by mail addressed to: Box Comments—Patents, Assistant Commissioner for Patents, Washington, DC 20231; or by facsimile to (703) 308-6916, marked to the attention of Mr. Bernstein.

Concerning § 1.53 in General: John F. Gonzales, Fred A. Silverberg, or Robert W. Bahr, Senior Legal Advisors, at the above-mentioned telephone number.

SUPPLEMENTARY INFORMATION: Continued Prosecution Application (CPA) practice under § 1.53(d) was adopted to permit applicants to obtain further examination of an application. *See Changes to Patent Practice and Procedure;* Final Rule Notice, 62 FR 53 13 1, 53 147 (October 10, 1997), 1203 *Off. Gaz. Pat. Office* 63, 76-77 (October 21, 1997). Section 1.53(d) as adopted, effective December 1, 1997, required, *inter alia,* that the prior application of a CPA be filed on or after June 8, 1995. *See* Final Rule Notice, 62 FR at 53186, 1203 *Off. Gaz, Pat. Office* at 112. Thus, if an application was filed before June 8, 1995, the applicant was required to file a continuation (or divisional) under § 1.53(b) to obtain further examination.

Section 1.53(b) requires that any application filed thereunder (including a continuation or divisional) contain a specification (including at least one claim) and any necessary drawing. While § 1.53(b) permits the submission of a rewritten specification (with all prior amendments incorporated), such an option is only practical to those who have the prior application in electronic form. For those applicants who do not have the prior application in electronic form, their only option is to submit a copy of the prior application (including any appendix) along with a copy of all the amendments made in the prior application, as well as copies of all other papers filed in the prior application (*e.g.,* information disclosure statements (IDSs), affidavits, declarations) that are to be considered in the continuing application.

Subsequent to the adoption of the change to § 1.53(d), the Office received a number of comments indicating that it takes a considerable amount of time to prepare the papers required by § 1.53(b), even when copied from a prior application. In view of these concerns, the Office amended § 1.53(d)(1)(i) by an immediately effective interim rule to eliminate its requirement that the prior application of a CPA be filed on or after June 8, 1995, and requested public comment on this interim rule change. *See Changes to Continued Prosecution Application Practice;* Interim Rule Notice, 63 FR 5732 (February 4, 1998), 1207 *Off. Gaz, Pat. Office* 83 (February 24, 1998).

The Office has received a number of comments by telephone expressing support for the change to § 1.53(d)(1)(i), as well as its immediate adoption and applicability to CPAs filed on or after December 1, 1997 (*i.e.*, all CPAs). The Office, however, has received no written comments on the change to § 1.53(d)(1)(i). Accordingly, the change to § 1.53(d)(1)(i) in the interim rule—removal of the requirement that the prior application of a continued prosecution application (CPA) under § 1.53(d) must have been filed on or after June 8, 1995—is adopted as a final rule.

As discussed in the Interim Rule Notice, no patent issuing from a CPA under § 1.53(d) is entitled to the provisions of 35 U.S.C. 154(c). To avoid confusion as to the term of any patent issuing on a CPA, other than an application for a reissue or design patent, of an application filed before June 8, 1995, the Office will include the following notice on any patent, other than a reissue or design, issuing on a CPA:

> This patent issued on a continued prosecution application filed under 37 CFR 1.53(d), and is subject to the twenty-year patent term provisions of35 U.S.C. 154(a)(2).

The term of a design patent is fourteen years beginning on the date of grant as provided in 35 U.S.C. 173. The term of a reissue patent is the unexpired part of the term of the original patent as provided in 35 U.S.C. 251. Since the term of a reissue or design patent is not affected by the filing of a CPA, the above-mentioned notice will not be printed on any reissue or design patent.

Other Considerations.

This final rule is in conformity with the requirements of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), Executive Order 12612 (October 26, 1987), and the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). It has been determined that this rulemaking is not significant for the purposes of Executive Order 12866 (September 30, 1993).

This final rule involves a collection of information subject to the Paperwork Reduction Act. This final rule involves the deletion of the requirement which stated that the prior application of a continued prosecution application must have been filed on or after June 8, 1995. This collection of information has been previously approved by the Office of Management and Budget (OMB) under OMB Control Number 0651-0032. The public reporting burden for this collection of information is estimated to average 7.88 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the information. Send comments regarding this burden estimate or any other aspect of the data requirement, including suggestions for reducing the burden to Hiram H. Bernstein or Robert W. Bahr at the address specified above and to the Office of Information and Regulatory Affairs, OMB, 725 17th Street, N.W., Washington, D.C., 20503 (Attn: PTO Desk Officer).

Notwithstanding any other provision of law, no person is required to respond to nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a currently valid OMB Control Number.

The principal impact of this final rule is to relieve a restriction in § 1.53(d)(1)(i) to permit applicants to file a CPA in the situation in which the prior application was filed before June 8, 1995.

The Office has determined that this final rule has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612 (October 26, 1987).

List of Subjects in 37 CFR Part 1

Administrative practice and procedure, Courts, Freedom of information, Inventions and patents, Reporting and record keeping requirements, Small Businesses.

For the reasons set forth in the preamble, the interim rule mending 37 CFR Part 1 which was published at 63 FR 5732-5734 on February 4, 1998, is adopted as a final rule without change.

* Includes turnaround times for files on official search and file reconstruction.

The backlog of orders resulting from the relocation of the Office of Public Records in late March and early April is now being worked down. During the month of June 1998, a total of 11,902 orders (21,899 copies) were filled and closed, or 3,378 orders (4,591 copies) more than the FY-98 planning number of 8,524 orders (17,308 copies) to be closed per month. It is anticipated that average turnaround times for products will return to expected ranges as older orders are filled and closed

during the month of June using additional staff resources and overtime.

Due to varying availability of media, customers will not be advised when orders are not delivered within the published goal periods. However, customers will be advised if any unexpected delay in their order has been identified. Customers should use the above actual days to mail for each product as a guide as to when they can expect their orders. In determining expected delivery times, the day an order is received in the Office is calculated as "day zero." The next business day is "day one."

Delivery of any specific copy will vary based on the availability of scanned images, microfilm products, and/or file accessibility. On June 10, 1997, the Office published an Official Gazette Notice entitled "Changes in Practice in Supplying Certified Copies and Filing Receipts" (1199 OG 39) which advised customers who placed orders for certified copies of patent applications-as-filed not to request them until the official filing receipt is received; images and related bibliographic data are not available to Certification Division until the filing receipt is generated by the Office of Initial Patent Examination.

Customers are encouraged to fax orders for copies directly to Certification Division at (703) 308-9759 and to pay by PTO Deposit Account, MasterCard, or Visa. Information on the status of pending orders may be obtained by calling (703) 308-9726 or 1 (800) 972-6382 (outside the Washington, DC Metro area), or via E-mail: certdiv@uspto.gov.

Interim Waiver of 37 C.F.R. § 1.84(b)(1) for Petitions to Accept Black and White Photographs and Advance Notice of Change to M.P.E.P. § 608.02

The Patent and Trademark Office (PTO) is *sua sponte* waiving 37 C.F.R. § 1.84(b)(1) to the extent that a petition and petition fee are no longer required in order to accept black and white photographs in lieu of drawings. The reason for this waiver is that the PTO intends to amend 37 C.F.R. § 1.84(b)(1) to eliminate the requirement for a petition and petition fee.

Because a significant period of time will elapse before any final rule change can be promulgated, effective as of the publication date of this notice, the PTO will, *sua sponte,* waive 37 CF.R. § 1.84(b)(1) to the extent that a petition and petition fee are no longer required for acceptance of black and white photographs in applications that are pending as of the publication date of this notice or any applications filed thereafter. If an Office action has been mailed which requires a petition under 37 C.F.R. § 1.84(b)(1) and/or a petition fee, an acceptable reply to the Office action would be a reference to this notice and a request that the requirement be withdrawn. However, any petition fees set forth in 37 C.F.R. § 1.17(i) which were paid prior to the publication date of this notice will not be refunded, since they were required at the time they were paid. A fee authorized to be charged to a deposit account is considered to have been paid on the date the paper with the authorization was filed. Any petition fees set forth in 37 C.F.R. § 1.17(i) paid or authorized to be paid after the publication date of this notice will not have been required at the time the fees were paid or authorized and may be refunded. See 37 C.F.R. § 1.26(a). Manual of Patent Examining Procedure, Section 608.02 will be amended consistent with this Notice.

Background of 37 C.F.R. § 1.84(b)(1) and Rationale for Amendment

Currently, under 37 C.F.R. § 1.84(b)(1), the PTO will accept black and white photographs in utility and design patent applications in lieu of drawings upon the granting of a petition to accept the photographs. However, petitions under 37 C.F.R. § 1.84(b)(1) do not serve a usefulpurpose in the examination process and therefore unnecessarily delay the issuance of patents containing black and white photographs. As noted in "Interim Waiver of 37 C.F.R. 1.84(b)(1) for Petitions to Accept Black and White Photographs Filed with Only One Set of Photographs," 1211 O.G. 34 (June 9, 1998), the PTO can now process black and white photographs for design and utility applications in the same manner as drawings for design and utility applications. Since the special handling process has been eliminated, a petition is no longer necessary. In addition, the requirement for a petition for black and white photographs as set forth in 37 C.F.R. § 1.84(b)(1) does not address when black and white photographs are acceptable in an application instead of drawings. Manual of Patent Examining Procedure (MPEP), section 608.02, states that the photographs or photomicrographs "must show the invention more clearly than they can be done by India ink drawings," but 37 C.F.R § 1.84(b)(1) does not include this language. Accordingly, petitions under 37 C.F.R. § 1.84(b)(1) are grantable if the petition fee set forth in 37 C.F.R. § 1.17(i) is included and the photographs are either properly mounted or on double weight photographic paper, even though photographs may not be acceptable instead of drawings in that application because the subject matter is capable of illustration by a drawing. See 37 C.F.R. § 1.81(c). For example, a photograph of a syringe would not be acceptable if the syringe is capable of being drawn. In addition, the requirement of a petition to accept black and white photographs leads to delays in issuance of patents containing photographs (increases the cycle time of applications with photographs) and misuses valuable resources for several reasons. First, the petitions take time to decide, which adds to the processing time of applications with black and white photographs. Second, an added delay is caused by the practice of applicants first filing petitions under 37 C.F.R. § 1.84(b)(1) while applications are being prepared for issuance and are no longer in the Technology Centers, where such petitions are decided, which requires applications with the petition and photograph(s) to be returned to the Technology Centers for treatment of the petitions. For these reasons, the requirement of 37 C.F.R. § 1.84(b)(i) for a petition and petition fee should be eliminated.

This change in procedure should not change the number of applications in which photographs are filed. **Photographs continue to be acceptable only in applitations in which the invention is not capable of being illustrated in an ink drawing or where the invention is shown more clearly in a photograph.** For example, photographs or photomicrographs of electrophoresis gels, blots, e.g., immunological, western, Southern, and northern, autoradiographs, cell cultures (stained and unstained), histological tissue cross sections (stained and unstained), animals, plants, in vivo imaging, thin layer chromatography plates, crystalline structures, metallurgical microstructures, textile fabrics, grain structures, and ornamental effects continue to be acceptable.

If a photograph that is filed in an application shows an invention which is capable of illustration, the examiner will, pursuant to 37 C.F.R. § 1.81(c) and/or 37 C.F.R. § 1.83(c), require a drawing of the subject matter. For example, syringes are capable of being drawn and drawings would generally demonstrate the details thereof more clearly (for example, cross hatching can be included to show the materials used). If a photograph (or a copy of a photograph) of a syringe is filed with the application, the examiner should require a drawing in lieu of the photograph. If the subsequently submitted drawing contains new matter, however, the examiner will not approve entry of the drawing, so applicants should be careful when initially submitting photographs instead of drawings. See MPEP 608.02(h) and 608.04. (The issue of new matter can also arise if a poor quality photograph or a photocopy of a photograph which is a poor reproduction is originally submitted and a better quality or the original photograph is later submitted and shows details beyond that shown in the photograph or photocopy that was originally submitted.)

It is noted that this change in procedure only applies to black and white photographs for utility and design applications. The current requirements for petitions for color drawings or color photographs are not affected. Color drawings and color photographs require special handling in the Office and the requirement for a petition is one mechanism for ensuring that these applications are properly processed. Thus, a petition, petition

fee, and a reference in the specification continue to be necessary in design and utility applications for color drawings or color photographs to be accepted under 37 C.F.R. § 1.84(a)(2).

Interim Waiver of 37 C.F.R. § 1.163(b) for Two Copies of a Specification of an Application for a Plant Patent

The Patent and Trademark Office (PTO) is *sua sponte* waiving 37 C.F.R § 1,163(b) to no longer require two copies of a specification for an application for a plant patent. The reason for this waiver is that the PTO intends to amend 37 C.F.R. § 1.163(b) to eliminate this requirement.

Because a significant period of time will elapse before any final rule change can be promulgated, effective as of the publication date of this notice, the PTO will, *sua sponte*, waive 37 C.F.R. § 1.163(b) to the extent that two copies of the specification of a plant patent application are no longer required.

Background of 37 C.F.R. § 1.163(b) and Rationale for Amendment

Under the existing rule, two copies of the specification, including the claim, of an application for a plant patent are required. The reason for this requirement was so that one copy of the application could be forwarded to the Agricultural Research Service of the Department of Agriculture where necessary for examination of the application. However, the Office seldom requests the assistance of the Department of Agriculture in the examination of plant patent applications and the duplicate copies of the specification are removed from the application file and stored separately. In the unusual situation where the duplicate copy of the specification required by 37 C.F.R. 1.163(b) has not been provided, plant patent examiners have not been requiring a duplicate copy and, instead, have been making the required copy. If the requirement for two copies is eliminated, and the Office desires the assistance of the Department of Agriculture, the Office will make the required duplicate copy. The elimination of the duplicate copy requirement will reduce the burden on plant patent applicants in filing an application for a plant patent. Furthermore, by elimination of this requirement, the storage space required for plant patent applications will be reduced, since the Office will no longer have to store duplicate copies. Any duplicate copies of the plant application specification submitted after the publication date of this notice or that are currently being stored by the Office may be discarded.

This change in practice does not effect the number of color drawings or color photographs that are required for a plant patent application. Two copies of color drawings or color photographs continue to be required for processing of a plant patent application. 37 C.F.R. 1.165(b). One of the two copies of the drawings is placed in the application file and is used during prosecution of the application, including printing of the patent. The second copy is used in the interference files, where it is also available to be sent to the Department of Agriculture, should the need arise. The second copy is also available for use by the printer in the event that the first copy is lost or damaged.

If there are any questions or comments about this change in practice, they should be forwarded to Karin Tyson, Senior Legal Advisor, by facsimile at (703) 308-6916, by telephone at (703) 305-9285, or by e-mail at karin.tyson@uspto.gov.

Reference Collections of U.S. Patents and Trademarks
Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information from the U.S. Patent and Trademark Office. Many PTDLs have on file patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs receive both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office* and numerical sets of patents in a variety of formats. Patent and trademark search systems in the Cassis CD-ROM series are available at all PTDLs to increase access to that information. It is through the CD-ROM systems and other depository materials that preliminary patent and trademark searches may be conducted through the numerically arranged collections.

Each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials.

All information is available for use by the public free of charge. However, there may be charges associated with the use of on-line systems, photocopying and related services.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

Partnership PTDLs provide enhanced and expanded services for which fees are charged. They offer on-line patent text and image searching, on-line trademark searching, and videoconferencing for examiner interviews and workshops. They accept disclosure documents on site, order file wrappers, assignment documents and certified copies for their customers, and host a variety of seminars aimed at specific audiences, including practitioners, paralegals, and independent inventors. Currently, partnerships are located at the Great Lakes Patent and Trademark Center (GLPTC) at the Detroit Public Library in Detroit, Michigan and the Sunnyvale Center for Innovation, Invention and Ideas (SCI^3) in Sunnyvale, California.

*A communication from the examiner should have been received in most applications filed prior to this date.

Patents will Expire as Follows:

(1) The term of any utility or plant patent that is in force on or results from an application filed before June 8, 1995 is the greater of the 20 year term provided in 35 U.S.C. 154(a)(2) or 17 years from grant subject to any terminal disclaimers. 35 U.S.C. 154(c)(1).

(2) All utility and plant patents granted on applications having an actual United States filing date on or after June 8, 1995 are granted for a term which begins on the date on which the patent is granted and ends 20 years from the date on which the application was filed in the United States. If the application contains a specific reference to an earlier application under 35 U.S.C. 120, 121 or 365(c), the patent term ends twenty years from that date on which the earliest application was filed. 35 U.S.C. 154(a)(2).

(3) All design patents are granted for a term of 14 years from the date of the grant.

However, the term of any patent may have been curtailed by disclaimer under the provisions of 35 U.S.C. 153, have lapsed due to failure to pay maintenance fees, or have been extended under the provisions of 35 U.S.C. 154, 155, or 156. Thus, if more reliable information is needed with respect to a particular patent, then the specific patent file should be reviewed to determine the actual date of patent expiration.

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
